## NEWS RELEASE

### **NeraTel Partners with Taiwan's uniXecure to Offer Cybersecurity Solutions for SMEs**

**SINGAPORE, 4<sup>th</sup> January 2024** – Nera Telecommunications Ltd (“NeraTel”, 挪拉电讯, or the “Group”) has entered into a strategic partnership with Taiwan-based cybersecurity leader uniXecure Corporation Ltd. (“uniXecure”) to deploy cybersecurity solutions for small and medium enterprises (“SMEs”) in Southeast Asia.

Under the partnership, the SGX Mainboard-listed IT network infrastructure leader will be the preferred partner in the region to offer solutions dedicated to SMEs which have become the prime targets of cyber-crimes in recent years due to cost limitations and lack of in-depth cybersecurity expertise.

During the initial phase of the two-year collaboration, NeraTel will leverage its international footprint to deploy uniXecure's cybersecurity services in Southeast Asia, a region of 680 million people driving one of the world's fastest economic growth rates. After the initial collaboration, NeraTel will take over technical support and pre-sales from uniXecure, which will maintain its commitment to extensive research and development, fortifying its capacity to deliver cutting-edge cybersecurity solutions.

uniXecure is a wholly owned subsidiary of Taiwan Stock Exchange-listed SYSTEX Group. With over 100 staff, uniXecure provides one-stop cybersecurity solutions to government agencies and enterprises such as cybersecurity detection and services, continuous 24/7 monitoring services, and post-incident response such as phishing, ransomware and distributed denial-of-service (DDoS) attacks.

NeraTel's Chief Executive Officer Mr Chong Hoi Ming (莊海明) ("Mr Chong") said, "We are excited to collaborate with an established cybersecurity player such as uniXecure. This partnership underscores our efforts to enhance our cybersecurity competencies to provide best-in-class solutions and services, to bolster our position within the market."

"As cyberthreats grow increasingly sophisticated and more frequent, SMEs urgently need to adopt effective cybersecurity solutions to protect their businesses. Yet, many SMEs find it a challenge to get adequate protection for their needs due to cost constraints. This partnership combines uniXecure's deep domain expertise with our agile implementation ability to offer cost-efficient software tailored to meet the specific needs of SMEs, with limited to no disruption to business."

uniXecure's Chairman Mr Jackie Chan (詹伊正) said, "uniXecure harnesses Taiwan's deep cybersecurity expertise to offer proprietary products that can be tailor-made to the unique needs of every corporation. Singapore, as a strategic hub in Southeast Asia, is an attractive location for international corporate headquarters, making it a prime target for cyber threats."

"Our collaboration with NeraTel allow us to offer our comprehensive and collaborative defense strategy, successfully deployed in Taiwan, to an international platform, starting with Singapore as the initial step. We look forward to working closely with NeraTel in enhancing the region's cyber resilience."
